[2024 Potable Water Tank Inspection and Cleaning Project](#)

Bid Date: 5/6/2024 12:00 PM **San Marcos**

The Vallecitos Water District (District) is soliciting proposals from professional tank commercial dive firms with substantial experience in the cleaning and inspection of potable water storage facilities. The contract will include cleaning and inspection services by a diver of the District's potable water storage tanks. Factors to be considered include equipment, price, warranty, references, and experience. The District will be the sole judge of the weights given these factors. The successful Contractor shall furnish all labor, materials, equipment (including hydraulic compressor), fuel, tools, licenses, bonds, and insurance necessary to perform the required services outlined in this RFB document. The cleaning and inspection will take place while the tanks remain in service. All persons and materials entering the tank/reservoir shall be disinfected in accordance with the standards outlined in AWWA C652-19 (Disinfection of Water Storage Facilities). The Contractor will always have a fully certified stand-by diver on-site while a primary diver is working in the tank.

Mobile Charging System for Electric Ground Support Equipment

Bid Date: 5/15/2024 2:00 PM

San Diego

The San Diego County Regional Airport Authority ("Authority") seeks bids from firms ("Bidder") for provision of equipment to charge electric ground support equipment ("eGSE") that is owned and operated by cargo carriers at the Airport. The Authority is seeking a mobile charging solution to maximize flexibility for where eGSE are charged and to avoid installing fixed charging equipment in areas planned for other near-term development. Additionally, the Authority seeks mobile battery storage to provide power to the mobile eGSE chargers. The Authority seeks three (3) towable battery storage carts and three (3) towable charger carts with up to four (4) chargers each to provide a minimum of twenty (20) eGSE charging ports powered by the battery systems ("Equipment and services") at the San Diego International Airport.

May 24, 2024

San Diego LOSSAN Rail Realignment - SDSVDT - Public Outreach Services

Bid Date: 5/24/2024 5:00 PM

San Diego

The San Dieguito to Sorrento Valley Double Track (SDSVDT) project is part of a larger program of improvements to be carried out on the LOSSAN Corridor in order to enhance the safety and reliability of existing services as well as accommodate projected increases in passenger and freight services between San Luis Obispo, Los Angeles, and San Diego. The SDSVDT Project proposes to relocate the existing single-track alignment of the LOSSAN Rail Corridor through the City of Del Mar and City of San Diego, where the rail line runs along a terrace on the coastal bluffs, to a future double-tracked alignment between the south side of the San Dieguito Lagoon basin (near the Del Mar Fairgrounds) and the north end of Sorrento Valley in the City of San Diego. The alternatives analyzed would replace the existing LOSSAN Rail Corridor alignment along the coastal bluffs with a new alignment away from the bluffs, primarily located within tunnels through the coastal hill of Del Mar and on aerial structures and berm through Los Peñasquitos Lagoon. The relocation of the tracks would eliminate the safety and operational risks caused by bluff erosion, and provide greater track capacity and a higher operating speed for trains that use the corridor, enabling projected increases in service. SANDAG is seeking external consultant with expertise in public affairs, communications and community engagement services to collaborate with SANDAG staff in the formulation and execution of a comprehensive public outreach strategy.

Professional Geotechnical, Material Testing and Construction Inspection Services (City Project Nos. 801 0101, 801 0110, 804 0015)

Bid Date: 5/7/2024 2:00 PM

Moreno Valley

The City of Moreno Valley desires to select one firm through this RFP process to perform professional geotechnical, material testing and construction inspection services for three (3) construction projects: Citywide Pavement Rehabilitation Program FY 23/24 (Project No. 801 0101), Pavement Rehabilitation for Various Streets (CDBG FY 23/24) (Project No. 801 0110) and Sunnymead MDP Line B-16A (Project No. 804 0015). The Citywide Pavement Rehabilitation Project provides pavement rehabilitation and preservation for approximately 135 local and arterial streets. The Pavement Rehabilitation for Various Streets (CDBG FY 23/24) consists of the construction of approximately 1,400 linear feet of 24" RCP mainline storm drain connecting to an existing storm drain line on Day Street, construction of a new asphalt road on Brill Road and street improvements for fifteen (15) local streets. The Sunnymead MDP Line B-16A Project consists of the construction of approximately 2,500 linear feet of a 24" RCP mainline storm drain connecting to an existing storm drain line on Kitching Street, termination on Kalmia Avenue and the construction of a new asphalt road on Kitching Street. The selected Consultant will be required to have personnel available for assignments to these projects who have successfully provided professional services as it relates to all activities of public works construction. The selected Consultant shall provide geotechnical, material testing and inspection services with personnel trained and experienced in geotechnical and construction inspection work for the construction of public works improvements and particularly the types of construction required for these projects.

[Oak Hills Reservoir, Summit Inlet/Outlet Structure & Lenain Wash Facility Recoating & Upgrades Project](#)

Bid Date: 5/9/2024 2:00 PM

Anaheim

The project is located at three separate locations within the City of Anaheim; the Oak Hills Reservoir, the Summit Inlet Outlet Structure Electrical Control Panel and the Lenain Wash Water Recovery Facility. Oak Hills Reservoir - The primary work takes place at the Oak Hills Reservoir and includes miscellaneous repairs. This project includes recoating the reservoir roof, paint touch up of the reservoir exterior wall coating and safety striping on the reservoir roof perimeter. The project also includes improvements to replace the tank's interior cathodic protection system, air-vents, outlet piping, and operational valving and installation of safety improvements to the reservoir ladder. The project is part of the Utilities' program to rehabilitate or replace aging infrastructure. Summit Inlet Outlet Structure Stainless Steel Control Panel - This project will provide for replacement of the electrical Control Panel for the Summit Inlet Outlet Structure, across the street from the Summit Pump Station. The electrical and SCADA components will also be removed and placed in a new control panel cabinet and concrete pad. Lenain Wash Water Recovery Facility - Coating touch-up of the Lenain Wash Water Recovery Facility equipment and tanks. And all other appurtenant work as shown on the approved plans and specifications.

Construction Management Services for US395 Phase 2 Widening Project

Bid Date: 5/9/2024 2:00 PM **San Bernardino**

The San Bernardino County Transportation Authority ("SBCTA") is seeking professional services for the construction management for the US395 Phase 2 Widening Project ("Project") and to relieve congestion and enhance the safety and operational efficiency of the corridor by constructing a continuous four-lane highway, which would improve passing opportunities and add capacity to meet future traffic volumes. The existing US-395 has two lanes within the project limits, one lane in each direction, with additional turning lanes at intersections. This Project would widen US-395 from 2 lanes to 4 lanes, with a continuous median, for a distance of approximately 7 miles between I-15 and SR-18 (Palmdale Rd) including adding a bridge over the California Aqueduct.

Stewart Park Improvement Project

Bid Date: 5/17/2024 11:00 AM

Beaumont

The Base Bid includes demolition of existing park facilities and the former streets along E. 9th Street and E. 10th Street between Orange Avenue and Maple Avenue. The Base Bid additionally includes grading and construction of stormwater features within the entire park site bounded by the southern edge of E. 11th Street to the park's southern boundary and between Orange Avenue and Maple Avenue. Park improvements included in the Base Bid are shown in the Base Bid Area of the Plans and include installation of new headwalls and culverts for the flood basin on the northern area of the park; construction of a new multi-level playground with premanufactured towers, swings, slides, a zip line, and modular tunnel, as well as shade structures and seating; construction of a new splashpad; construction of a combined restroom and pump station building with electrical, water, and sewer connections; construction of new pathways with picnic areas and seating spaces; installation of pedestrian lighting along pathways and in key use areas in the Base Bid area; installation of a new irrigation system and providing irrigation to the planting within the Base Bid area; planting new trees, turf grass, and shrubs through the Base Bid Area; and reconfiguration of the western side of Maple Avenue to provide street parking along the park. The Base Bid includes coordination with a premanufactured building provider to obtain final building plans and foundation details for the restroom and pump station building. The contractor shall obtain a no-fee building permit for these plans prior to construction. Following approval, the contractor shall construct the foundation and coordinate shipping and installation of premanufactured structure.

[A&E Services for City Hall Remodel and Building Addition](#)

Bid Date: 5/22/2024 2:00 PM**Jurupa**

The City of Jurupa Valley (City) is soliciting proposals from reputable design firms with demonstrated expertise in Architectural and Engineering (A&E) services for the City Hall Remodel and Building Addition Project for APN 163-042-043 {8930 Limonite Avenue}. The project includes three distinct phases, though only phases 1 & 2 are part of this scope of work: • Phase 1 involves the construction of a new 10,500 square foot building addition and a corresponding parking lot. This addition will enhance the existing facilities and accommodate the growing needs of the community. NOTE: There will be a future 20,000 square foot addition to the 10,500 square foot add-on. • Phase 2 focuses on the minimal renovation of the current facilities, with an emphasis on optimizing workstations and collaborative spaces. Compliance with ADA regulations will be ensured where necessary to create an inclusive environment. • Phase 3, although not within the current scope, is planned for the future and involves the replacement of the existing City Hall. This forward-looking approach aims to develop a strategic campus master plan that will guide the evolution of the City's infrastructure.
